# SURESH BABU NARAVA

Aylesbury, UK | +44 7721 646062 | sureshbabunarava@gmail.com | LinkedIn | GitHub | Portfolio

## PERSONAL STATEMENT

Junior DevOps Engineer with over two years of commercial experience at Infosys, where I built and maintained cloud infrastructure and CI/CD pipelines for enterprise-scale systems. I'm comfortable across the full DevOps stack from writing Terraform modules and Ansible playbooks to managing containerised workloads on Kubernetes and wiring up observability with Prometheus and Grafana. I thrive in Agile teams, take ownership of problems, and care about building things that are reliable, repeatable, and easy for others to work with.

## WORK EXPERIENCE

**Systems Associate** · Infosys Pvt Ltd *Oct 2022 – Dec 2024*

- Designed and **maintained CI/CD pipelines** in **Jenkins** to automate build, test, and deployment workflows cutting release cycle times by 20% and significantly reducing error-prone manual handoffs.
- Provisioned and managed **AWS infrastructure** (EC2, IAM, VPC, RDS) using **Terraform**, establishing a consistent **IaC** workflow that improved environment parity and reduced configuration drift across dev, staging, and production.
- Wrote **Bash scripts** to **automate** routine **Linux system administration tasks**, reducing manual effort by 25% and freeing the team to focus on higher-value work.
- **Managed containerised applications** using **Docker** and **Kubernetes (EKS),** maintaining 99.9% uptime and enabling the team to scale services confidently without downtime.
- Deployed and **maintained monitoring stacks** with **Prometheus**, **Grafana, Datadog**, and **AWS CloudWatch** improving incident detection speed by 40% and giving the team visibility into both infrastructure and application health.
- Authored and **managed Ansible playbooks** for configuration management, standardising deployments across environments and eliminating inconsistencies caused by manual changes.
- **Implemented AWS IAM roles** and **policies** through Terraform to enforce least-privilege access, strengthening the security posture of applications and services.
- Participated actively in **Agile ceremonies**, used **JIRA** for sprint tracking, and contributed to code reviews ensuring infrastructure changes were well-documented, peer-reviewed, and aligned with team standards.

## PROJECTS

### End-to-End CI/CD Deployment of Java Application on AWS EKS

- Architected a complete CI/CD pipeline for a Java web application backed by MySQL, with fully automated build-to-deploy workflows using Jenkins and Docker.
- Provisioned the EKS cluster and all supporting infrastructure with Terraform, then integrated Prometheus and Grafana for real-time observability from day one.
- Achieved a 40% reduction in deployment time, improved release cadence, and maintained 99.9% availability with proactive alerting catching issues before they impacted users.

### Personal Portfolio Website

- Built a fully responsive personal site using HTML, CSS, and JavaScript to showcase projects, skills, and professional background, live and accessible via the Portfolio link above.

## TECHNICAL SKILLS

- **Cloud & IaC** - AWS (EC2, VPC, IAM, S3, RDS) · Terraform · Ansible
- **Containers** - Docker · Kubernetes (EKS) · Helm · Argo CD
- **CI/CD & VCS** - Jenkins · Git · GitHub · GitLab(Basics) · GitOps(familiar)
- **Observability** - Prometheus · Grafana · AWS CloudWatch · Datadog
- **OS & Scripting** - Linux (RHEL, Ubuntu) · Bash
- **Tooling & Other** - JIRA · Nexus · ServiceNow · Technical Documentation

## EDUCATION & CERTIFICATIONS

- **Bachelor of Computer Applications (First Class with Distinction)** | A N University | 2019–2022
- **DevOps Online Training (ISO 21001:2018 Certified)** | Frontlines Edu Tech Pvt Ltd | April 2025
